

# Technology Corner Profile

Low productivity and a low digitization rate have sparked an influx of new technology being developed, which has the potential to make a profound impact on the risks involved on construction projects and within asset management such as safety risk and design risk. Aon understands that this trend may be of interest to our clients and has created the Technology Corner to profile different construction technology and asset management companies. Each profile gives an overview of the technology, addresses its risk treatment potential, and identifies what insurance policies its implementation could impact. Our goal is multi-faceted to raise awareness about leading construction and asset management technologies that could help reduce risk on site for the purposes of educating our clients and the insurance markets.

## Product Description

The MegaSecur Water-Gate Barrier allows for the rapid, reliable and safe deployment of a water containment barrier that can be used in emergency situations. The concept of the Water-Gate is simple: it's the weight of the water that stops the water. Its simple and unique design makes it possible for the FM certified polymer canvas to collect excess water, while instantaneously stabilizing the barrier to protect against water related emergencies. The Water-Gate Barrier can be used for short or long durations of time without impacting its efficiency and durability, as it is resistant to corrosion and toxic materials.

MegaSecur allows for the safe and rapid deployment of water containment barriers. Its simple, unique design collects excess water, while instantaneously stabilizing the barrier.

The Water-Gate Barrier eliminates the need to use and dispose of hazardous sandbags, which are expensive to get rid of and can have a negative effect on the environment.

The Water-Gate Barrier is made from materials that are FM certified, flexible, durable, and environmentally friendly.

## Risks Treated

Key risks impacted by MegaSecur include:

## MegaSecur

## Comments from the Founder

“Creative since my childhood, I have evolved as a self-employed person throughout my whole career. This gave me the opportunity to carry out numerous projects which not only were dear to my heart, but also part of my job as an Industrial Designer. For more than 20 years, I am completely devoted to the development, manufacture, and sale the Water-Gate barriers. Today, I strive to make my company the world leader in large-scale flood controls.”

– Mr. Daniel Dery, President & Founder
